

## Principal's Desk

A nation's real and sustainable growth is possible with technological advancement and development of its human resource. The role of engineers, be it in the areas like construction, mechanical, electrical or software assumes so much more importance. Modern technology has made the world a level playing field. With globalization, engineers should be able to perform in a larger environment and are expected face challenges & find solutions in any given situation. Thus they have a greater scope to exhibit their skills. The key to meet the demand for such quality engineers remains in providing holistic engineering education. To meet these challenges, BMSCE offers best engineering programmes benchmarked with the leading educational institutions in the Country.

The institution emphasizes on creating an environment that promotes excellence. This takes the form of various initiatives to energize the different factors that impact the quality of education. A planned programme of study is one of the important components which are stressed upon the most. BMSCE has progressively implemented the academic autonomy by developing outcomes based approach to curriculum design and delivery. The curriculum is need-based and focuses on the overall development of students. The autonomous status has given the college excellent opportunity to revise, redesign or introduce innovations in the curriculum to suit the needs of industry. The high rate of academic performance and placement record is testimony of the outcomes owing to these measures. Well qualified & experienced faculty and committed staff are eager to provide effective education to students. The college facilitates number of para-academic activities which help the students to understand the relationship between what they learn and their application in the real world. The full fledged facilities enable the students to train and set new benchmarks. The institution puts continuous effort to improve the student support and services. The institution continuously monitors the progress of the students through various academic and para-academic committees. The achievement of the institution over the last few years can be measured to which the institution has achieved its goals and the academic and learning performance of its students. The Goal of the Institution to achieve NAAC and NBA Accreditation with Tier-I Accreditation were achieved with distinction. Under Technical Educational Quality Improvement Programme (TEQIP-A World Bank Project), the institution has been rated as one of the high performing institutes in the country.

The institute has played a significant role in developing human resource to meet the requirement of society at home and abroad. Over the past 70 years of its illustrious existence, BMSCE has produced more than 35000 engineers who have enriched the world through their contribution to technology and development.
